Hiring Manager
Microsoft.

Subject: Hiring Manager Microsoft

Dear Hiring Manager,

I am excited to apply for the Software Engineering Internship at Microsoft. As a second-year undergraduate student pursuing a Bachelor of Technology in Computer Science and Engineering at VIT AP University, I am eager to contribute my technical skills and problem-solving abilities to a company that drives innovation in technology.

With a strong foundation in Java (OOP), Python, and Data Structures & Algorithms, I have worked on multiple projects that highlight my expertise. Notably, I was a finalist in the national-level Toycathon 2021 Finale, where my team and I developed an innovative Augmented Reality-based educational application. Additionally, I am currently working on an AI-integrated Nutrition Platform using Google Gemini API and Django as part of the GDG Hackathon 2025. These experiences have strengthened my analytical skills, software development expertise, and teamwork—qualities essential for thriving in a dynamic environment like Microsoft.

Beyond technical proficiency, my ability to collaborate effectively in interdisciplinary teams and my passion for continuous learning make me an excellent fit for this role. I am particularly drawn to Microsoft's mission of empowering individuals and organizations through technology, and I am eager to gain hands-on experience while contributing to impactful projects.

I would welcome the opportunity to further discuss how my skills and experiences align with Microsoft's vision. Thank you for your time and consideration. I look forward to the possibility of joining Microsoft as a Software Engineering Intern.

Sincerely,

Swaroop Choda Naga Srinivasa
