Tirupati, Andhra Pradesh, India

PROFILE

Passionate undergraduate student with a strong interest in software development, backend systems, and emerging technologies. Experienced in building scalable backend services and intelligent applications, with solid problem-solving and teamwork abilities. Proficient in Java and Python, with working knowledge of Data Structures and Algorithms, Django, Node.js, React.js, and modern development tools.

EDUCATION

- VIT-AP University** Amaravati, Andhra Pradesh
Bachelor of Technology in Computer Science and Engineering; CGPA: 9.11/10 2023 – 2027
- Narayana Junior College** Tirupati, Andhra Pradesh
Higher Secondary Education; Percentage: 92.4% 2021 – 2023

EXPERIENCE

- Tally Solutions Pvt. Ltd.** Bengaluru, Karnataka
Software Intern 2025
 - Backend Development:** Built a RESTful backend service to convert JSON/XML invoices into Peppol-compliant UBL 2.1 format with XSD and Schematron validation.
 - Deployment:** Deployed backend services on AWS EC2 with end-to-end validation pipelines.
 - Recognition:** Received the “**Budding Tech Genius Squad Award**” for delivering high-quality results and demonstrating strong technical ownership during the internship.

PROJECTS

- AI-Powered Nutrition Platform (2025):** Developing an intelligent nutrition recommendation system to generate personalized diet plans based on user health goals.
Tech Stack: Django, Python, Google Gemini API, REST APIs
- Smart India Hackathon 2025 – Smart E-Learning App:** Developed an AR-based educational application featuring 3D monument models and an interactive virtual assistant.
Tech Stack: Unity, Vuforia, C#
- GDG Hackathon 2025 – AI Integrated Recipe Maker:** Built an AI-powered recipe generation application using modern AI APIs.
Tech Stack: Python, AI APIs, Web Technologies
- Toycathon 2021 – AR Based Application:** Created an AR-based educational application focused on toy and game-based learning.
Tech Stack: Unity, Vuforia, C#

ACHIEVEMENTS

- Smart India Hackathon 2025:** Qualified internal hackathon round by securing selection among **600+ teams**.
- Patent Publication:** Published a patent on an AR-powered laboratory learning system for smart education.
- Finalist – Toycathon 2021:** National-level competition conducted by Ministry of Education’s Innovation Cell.

SKILLS

- Programming Languages:** Java, Python, JavaScript, C, C++ (Basics)
- Web & Backend:** Django, Node.js, HTML, CSS, React.js (Learning Curve)
- Augmented Reality:** Unity, Vuforia
- Tools:** Git, GitHub

HOBBIES

- Multiplayer Gaming, Music, Movies and Web Series
